**AllergyEats Continues to Win Prestigious Awards,  
Demonstrates Value, Relevance for the Food Allergy Community**  
*Web Health Awards & Healthline Honor AllergyEats Website, App*

**Boston, MA**, August 5, 2014 - [AllergyEats](http://AllergyEats.com), the leading guide to allergy-friendly restaurants nationwide, has recently received prestigious recognition from Web Health Awards and Healthline. Web Health Awards, which honor the best digital health resources, gave AllergyEats a Silver Award for Best Mobile Directory and a Bronze for Best Online Directory. Additionally, [Healthline](http://Healthline.com) recognized AllergyEats as one of the Best Allergy Apps of 2014.

In addition to winning these recent awards, the media continues to spotlight AllergyEats as a valuable and unique resource. For instance, a recent [Fox Business article](#) featured AllergyEats a top health app.

"We're delighted that AllergyEats continues to win such prestigious awards and receive tremendous recognition. Based on the great feedback we're getting from users, awards we're winning, endorsements from food allergy organizations, and positive media coverage, it's clear that AllergyEats is meeting an important need in the food allergy community," said Paul Antico, Founder and CEO of AllergyEats, father of three food-allergic children and passionate food allergy advocate.

"It's exciting to win these notable Web Health Awards this year, and it's a true honor to be recognized alongside such prestigious, health-focused organizations as AARP, Cigna, Dana-Farber Cancer Institute and the other best-in-class award winners," Antico continued. "And being named to Healthline's list of Best Allergy Apps, which we also won last year, is a significant honor. We're in good company beside the American Red Cross, Zyrtec, and other organizations that are leading the way to raise awareness, offer support and help those with allergies."

AllergyEats ([www.AllergyEats.com](http://www.AllergyEats.com)) is a free, peer-based website and app where people find and rate restaurants based solely on their ability to accommodate food allergies. The site, app and related social media forums help families with food allergies reduce the guesswork - and the anxiety - surrounding dining out with food allergies.

"AllergyEats is a restaurant review guide focused exclusively on how restaurants accommodate food allergies, rather than other factors such as ambiance, service or menu. AllergyEats helps the entire food allergy community make more informed decisions about which restaurants to visit and which to avoid, depending on how allergy-friendly they are," Antico explained. "Additionally, AllergyEats has built a large, lively social media community, where users regularly share tips, advice, support and updates on a variety of food allergy topics."

AllergyEats lists more than 750,000 restaurants nationwide, which people can rate, and it also offers web links, menus and more. Restaurants are easily searchable by geographic location, so people can find allergy-friendly restaurants around town and around the country.

In addition to the most recent Web Health Awards and Healthline honors, AllergyEats has received a variety of other high-profile awards, including About.com's Readers Choice Awards, Healthline's Best Allergy Health App of 2013 and Healthline's Best Allergy Blog. AllergyEats has also previously won several other Web Health Awards.
